GROOVY*

Chief of Base, Munich

Chief of Station, Vienna

GROOVY/DIRECTOR/GRUB/Operations

INFO: C/EE

Communications Summary Cards

Reference: 33239

1. On receipt of reference report, it occurred to Vienna Station it would be desirable for GRUB to work out a system in simple summary form for recording in a simple manner and in a form where the information is readily available:

a. Data drops

b. Accommodation addresses and/or safe houses

c. Recognition signals, oral, visual, primary, secondary, etc.

2. This should not be interpreted to require elaborate systems of primary and secondary recognition signals, but simply a recording procedure whereby those signals ultimately selected for GRUB and GROOVY will be instantly available not only to GRUB, but also to Vienna Station and to Headquarters. 3. It is recommended starting with reference dispatch to implement the above in the simplest possible fashion and to make sure that both Vienna and Headquarters receive the necessary information requested.
